EDUCATION

University of Victoria	May 2022 - December 2025
Bachelor of Science in Computer Science	
Camosun College	September 2018 - August 2020
Diploma in Information and Computer Systems	

TECHNICAL WORK EXPERIENCE

Camosun College	
Full-Stack Developer	May 2020 - August 2020
- Managed a team of three to add features and fix issues of a legacy codebase for a web-based educational quiz game. - Created with MySQL, PHP, HTML, CSS, Javascript, jQuery, and Phaser (HTML5 game framework). - Installed and configured Ubuntu virtual machines for internal use resulting in smoother development and testing. - Self-taught Phaser alongside development. - Refactored a legacy SQL database to comply with industry standards and allow for easier future additions. - Refactored legacy code to less than 15% of space while modularizing it for easier modification. - Developed in Agile format with weekly scrum meetings with our client.	

TECHNICAL PROJECTS

Mockup Online Storefront for Pet Supply Provider	February 2019 - March 2019
Collaborated with a team of four developers to construct an e-commerce website supported by a product/sales database. Implemented using PHP, HTML, Javascript, SQL.	
Human Centered Design Project	May 2023 - August 2023
Improved upon the UI for an existing application to help users better understand multitudes of data used to train AIs.	
Computer Graphics Project	May 2024 - August 2024
Created a 3D rendering system with ray tracing and rasterization from scratch in C++.	
Video Game Project	September 2024 - December 2024
Created "Caro Dei", a short horror video game in the game engine Godot.	
AI Training Project	May 2024 - August 2024
Trained a simple AI model to classify species of flower based on its characteristics in Racket-lang.
